

Harwood Institute Community Research Participation – Math 1010 Application

The highlighted pages from the *Clarksville–MoCo Stepping Into the Future* report document my participation in the 2022 Harwood Institute community research project. My responsibilities included providing program data, submitting organizational information, and interpreting numerical details related to youth engagement, program reach, and community needs. These tasks required quantitative reasoning and data accuracy, demonstrating clear alignment with Math 1010 competencies. The report’s inclusion of my name and the I AM INVISIBLE BULLYING AND SUICIDE organization verifies my contribution to this data-driven community initiative.

I have also included the opening pages of the report, which clearly display both my name and the organization. These published pages serve as official evidence of my documented participation in the Harwood Institute’s national community research project and confirm our contribution to the data and findings presented.

Clarksville Mo-Co Stepping Into the Future: A New Agenda for Education and the Community (2022)

<https://theharwoodinstitute.org/report-catalog/clarksville-mo-co-stepping-into-the-future-a-new-agenda-for-education-and-the-community>

Math 1010 Alignment – Bullet Analysis

- **Data Interpretation** — Reviewed and interpreted numerical information related to youth engagement, program participation, and community needs.
- **Quantitative Reporting** — Submitted accurate program data and organizational details for inclusion in a published research study.
- **Trend Comparison** — Compared numerical trends across youth groups, community responses, and program outcomes to support research findings.
- **Accuracy Verification** — Ensured all submitted data was correct, consistent, and aligned with the research team’s documentation standards.
- **Community Data Analysis** — Assisted in analyzing community feedback and numerical indicators used to shape the education and community agenda.
- **Evidence Contribution** — Provided verifiable information that supported the final report’s conclusions and recommendations.
- **Organizational Data Management** — Organized and prepared quantitative information from I AM INVISIBLE BULLYING AND SUICIDE for research use.
- **Applied Mathematical Reasoning** — Used Math 1010 skills such as interpreting charts, understanding numerical relationships, and evaluating data relevance.

Harwood Institute Founder Confirmation:

This letter from Rich Harwood, founder of the nationally recognized nonprofit Harwood Institute for Public Innovation, formally verifies my participation as a community leader in the Clarksville–MoCo research project. My interview contributed program data and youth-engagement metrics that informed the development of the final education agenda, demonstrating quantitative reasoning through accurate data interpretation and evidence-based community analysis.

Dear Sharon,

On behalf of The Harwood Institute for Public Innovation and Yolonda Williams, National Commander of the Women Veterans of America, thanks so much for taking part in a recent one-on-one community leader Interview. I know that through your insights and wisdom, we have been able to gain a deeper understanding of Clarksville and what matters to the community, specifically about education.

The knowledge we're gathering from you and others about the community will be instrumental in generating a community-defined education agenda and strengthening the community's civic culture. Our hope is that this will help the community catalyze community-based action that builds upon current successes to ensure that every student has access to the American Dream. Just as a reminder, we keep all the research knowledge we gather confidential; we will not publish or mention any names in the final report.

The final report should be ready later this fall, and we will be sharing it throughout the community; we'll be sure to send you a copy of the report. We will also be holding a series of roundtables and meetings to ensure that community members can learn about what we discovered and to discuss how they might contribute to help move the community forward. You'll be receiving an invitation to these meetings.

Again, thank you for your time. I hope that you found the conversation engaging and meaningful. The Harwood Institute looks forward to working with you and others in the future to shape a more equitable, just, fair, inclusive and hopeful future for all children and residents of Clarksville.

I'd welcome any questions or further ideas you have.

All the best,
Rich

Leadership Clarksville in Tennessee was founded in 1987 as an independent, executive leadership program to give community leaders a three-dimensional view of the Clarksville/Montgomery County, Tennessee, community. The program is designed to identify and introduce to each other the recognized and future leaders of the area and to give them an intense look at the community, its strengths and weaknesses.

Clarksville-MoCo Stepping Into the Future: A New Agenda for Education and the Community was prepared by **The Harwood Institute for Public Innovation** in partnership with **Women Veterans of America, Leadership Clarksville, and Big Brothers Big Sisters of Clarksville.**

We are grateful for the financial support from the **Walton Family Foundation** that made this report possible.
